Relevant Work Experience:

Web Developer

April 2022 – Present

Computer Professionals Inc.
Pasig City, NCR

- Develop and maintain code across both front-end and back-end systems, following best practices and ensuring code quality.
- Enhance and maintain existing applications and websites, implementing new functionalities and improving performance.
- Resolve bugs, optimize database queries, refactor code, and troubleshoot production issues to ensure system stability and efficiency.
- Collaborate with team members to address project enhancements and urgent issues, delivering solutions within established deadlines.
- Design and develop APIs to meet client requirements, incorporating necessary changes to Requests, Responses, System logic, Database Connections, and Error handling, utilizing technologies such as Java Spring Boot, Node.js, and AWS Lambda functions.
- Develop and implement front-end interfaces using Angular, Bootstrap, JavaScript, and jQuery.
- Execute front-end development tasks, including Page customization, API integration, JWT implementation, UI development, Session management, and Input validation.
- Configure and generate client reports using Jasper Reports.
- Strengthen application security by identifying and mitigating vulnerabilities, such as Cross-site scripting, SQL injection, Privilege escalation, and Sensitive data exposure.
- Communicate effectively with cross-functional teams (QAs, Business Analysts, DevOps) to address issues and ensure project alignment.
- Participate in skill development activities, share knowledge, teach and provide support to other developers.
